TEAM GNEXT'S Installation Guide

GNEXT Installation Guide

Step 1:

Install "wampserver" into your machine.
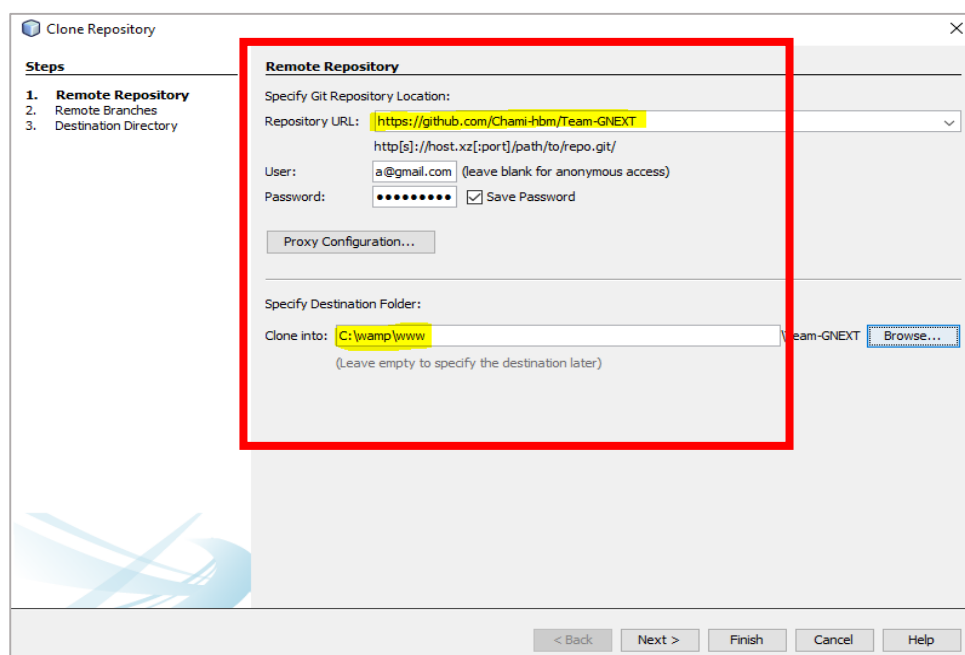

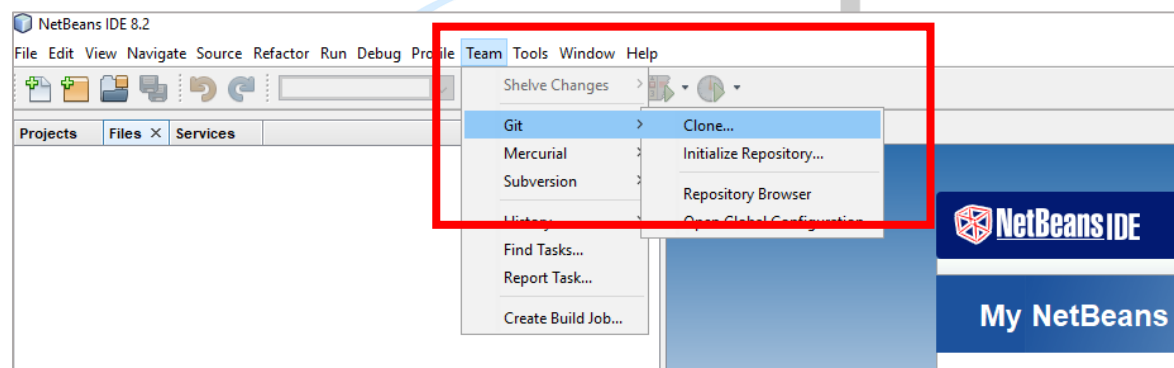

(http://www.wampserver.com/en/)

Step 2:

Get a clone or download from the **Master/Develop Branch** of Team GNEXT's GitHub repository to your Wampserver '**www**' folder. Example: (C:\wamp\www)

Repository URL	https://github.com/Chami-hbm/Team-GNEXT

We recommend to use '**NetBeans IDE**' (Should enable with PHP Plugin) to get a clone or you can use any other application.
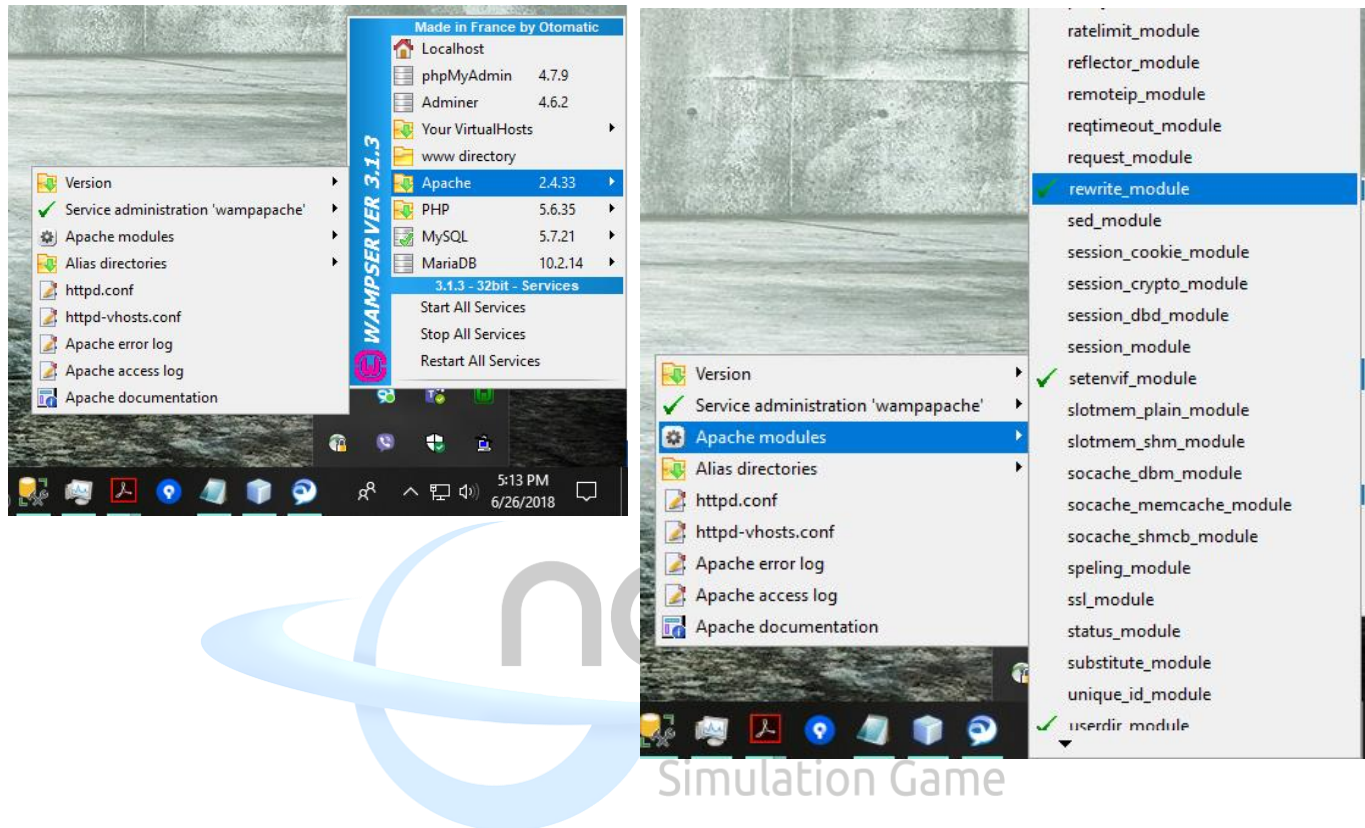

In NetBeans, Go to **Team -> Git -> Clone**
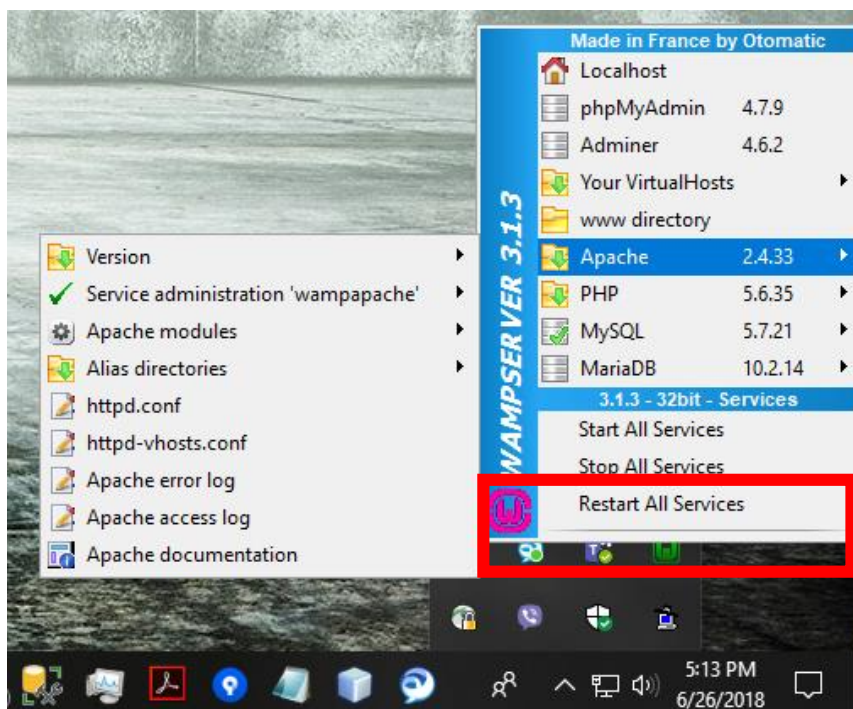

Provide your GitHub credentials

Step 3:

       1. Select Apache Server
       2. Enable Re-write option

In WampServer, **Apache -> Apache modules** and **Enable "rewrite_module"**.

Then click "Restart All Services" in the WampServer.

Step 4:

Navigate to **WampServer -> phpMyAdmin**.

Login using following credentials

Username: root
**Password**: " " (null)

Step 5:

1. Then Create a new database using database Name: "Team-GNEXT"
2. Import database from "C:\wamp\www\Team-GNEXT\system\database" which named as 'stock_market_simulation_webapp_db'
3. Make sure to **uncheck/Disable** the '**Enable foreign key**' option before applying **GO**.

You will navigate to the following page after successful attempt!

Step 6:

Navigates to Our Game in any browser.

http://localhost/Team-GNEXT/

Here are the test User credentials to Log in to the application.
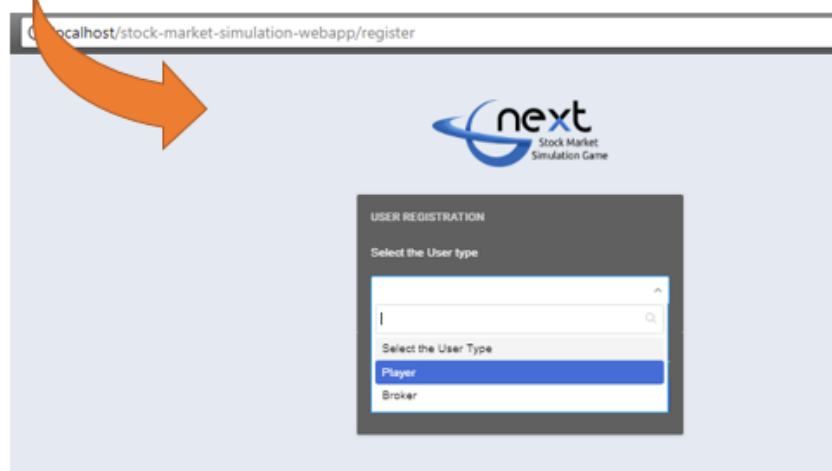

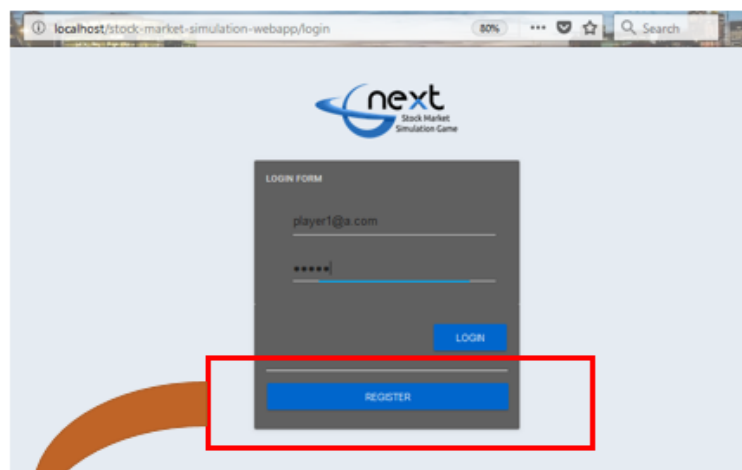

Player

Username: john@a.com
Password: 12345

### Broker

Username: robert@a.com
Password: 12345

If you want you creates a new user account by following registration process.

Step 7:

Once you are going to play the game, you should navigate to clock URL via another tab in order to start the Game, which means **Game Timer is customizable**!

http://localhost/Team-GNEXT/clock

Your change will synchronized with Game board of the player
